PERSONAL SUMMARY

I am a bright, talented and ambitious software/web developer with a strong technical background who possesses self-discipline and the ability to work with the minimum of supervision. Able to play a key role throughout the software & web development / support life cycle of a project to ensure that quality solutions meet business objectives. Possessing a good team spirit, deadline orientated and having the ability to organize and present complex solutions clearly and accurately. I understand the vital role of a team dynamic within development and I always welcome the opportunity to work in an agile team.

Looking for a suitable developer position with an exciting and innovative company that offers room for progression.

WORK EXPERIENCE

Symantec – Ireland

L10N UA Localization Software Engineer Sept' 2016 - Present

Working within an agile team I was tasked at not only delivering L10N production but also tasked at maintaining Symantec's localization software tools and Kanban boards. Delivering localized content meant that I had to master Symantec's work process as well as using their repositories, Content management systems and coding for development in Java, Python and C#. I played a semi Scrum master role in designing and maintaining their Kanban work processes and prioritizing and delegating L10N workflow within the agile team.

Duties:

- L10N Software Engineering/Delivery/Production
- L10N Project Set up, Symtop configuration
- L10N Sanity/QA checks and amendments. (coding in xml)
- Design/develop and maintain Symtop content management system (coding)
- Kanban/Agile/Project set-up and management.

KEY SKILLS AND COMPETENCIES

- Working Knowledge of: XML, C#, Python, Java
- Knowledge of: HTML 5, CSS3, JavaScript
- Experience with Microsoft C# /Java related technologies.
- Ability to deliver time-saving solutions to tight deadlines.
- Ability to respond to pressure and meet tight deadlines.
- Ability to manage projects and deliver L10N content on time.
- Work within an agile team and reach out to key staff.

Veritas – Ireland**ACADEMIC

Web Developer/Web Production

January 2016 –Sept' 2016

As well as developing and maintaining Veritas's website I designed and developed tools specifically geared for QA process within the team. This involved coding from scratch in C# and Java. Contributing to both the requirements and technical aspects of any development specification is also part of the role. Investigating software problems identified in testing or via support & providing solutions, also assisting in the resolution of software support issues.

Duties:

- Website development/design / and maintenance
- AEM CQ6 development and production
- AEM Asset management and deployment.
- Design/develop and maintain multimedia applications
- C# programming
- Java Programming

KEY SKILLS AND COMPETENCIES

- Knowledge of: HTML5, CSS3, JavaScript, PHP, WordPress
- Knowledge of: AEM CQ6
- Experience with Microsoft C# /Java related technologies.
- Ability to deliver time-saving solutions to tight deadlines.
- Ability to respond to pressure and meet tight deadlines.

**Symantec – Ireland****Web Development/Web production**

August' 2015 – January 2016

During my time with Symantec I worked as a web developer and producer on the new Veritas project. This involved building the new Veritas connected experience its website and implementing the new development environment Adobe Experience Manager. Working as part of a very dynamic team we Developed cross-browser compatibility in HTML, CSS, and JavaScript using CQ5, CQ6 and Team site content management systems. We used a Kanban Agile environment to delegate work to the appropriate teams.

Duties:

- Website development/design /and maintenance
- Asset management in CQ5/6
- AEM CQ6 development and production
- Deployment of new web pages and new assets
- Quality Assurance on all pages, assets of the Veritas Website
- Training in SEO/and Team site.

KEY SKILLS AND COMPETENCIES

- Knowledge of: AEM, CQ5, Team Site, HTML5, CSS3, JavaScript.
- Experience of: PHP, WordPress, CMS's, Assets Management
- Experience with: Back end servers, client/server side servers
